

Dear FCC, Expansion of Low Power FM (LPFM) availability is a good idea - unless it displaces K-LOVE (100.5, 100.9 and 105.5). K-LOVE's broadcasts provide programs that I find to be uplifting and would be lost to me if it were replaced by some commercial LPFM station with more Rock and Roll/RAP type music or some "Shock-Jock" type programming. K-LOVE provides an alternative to the standard fare provide by many commercial type stations and I find it helps soothe my spirits after a hard day at work. Although I cannot speak for other listeners, I do believe many others feel much the same.

Sincerely,

Edward M. Culberson, Jr.
